

Testing embedded json

We used this for The Fascinator.

Create a html page.

```
<html>
<head>
<title>Solr Ajax Example</title>
</head>
<body >
<div id="result"></div>
<p/><pre>Raw JSON String: <div id="raw"></div></pre>
<script type="text/javascript" src="jsr_class.js"> </script>
<script type="text/javascript">
//<![CDATA[
function updatepage(rsp){
  var html= "<br>numFound=" + rsp.response.numFound;
  for (i=0; i<rsp.response.docs.length; i++ )
  {
    var doc =rsp.response.docs[i]
    html += "<br><a href='http://rspilot.usq.edu.au:8080/the-
fascinator/detail/"+doc.pid+"'>"+doc.title+"</a>";
  }
  document.getElementById("result").innerHTML = html;
  bObj.removeScriptTag();
}
var req = 'http://rspilot.usq.edu.au:8080/the-fascinator/solr?
wt=json&json.wrf=updatepage';
bObj = new JSONscriptRequest(req);
bObj.buildScriptTag();
bObj.addScriptTag();
//]]>
</script>
</body>
</html>
```
