

Chapter 3: Install/setup Paquete

3.1 Install Paquete

This page is meant for Developers' reference. This paquete installation is using Paquete 0.2.

3.1.1 Download Paquete

Either download [Paquete Client](#) for single javascript file download or

Check out from SVN for complete download, including demonstration.

```
svn co http://fascinator.usq.edu.au/svn/code/paquete/client/tags/0.2rc1
```

3.1.2 Setup Paquete

1. Copy the package files into a web folder.
2. Locate the host page, the main page of the package. For example default.html or index.html

Note

See example at <http://fascinator.usq.edu.au/svn/code/paquete/client/tags/0.1/demo>default.htm>.

3. Host page should have similar structure in body content as follows:

```
<body>

  <table border="0" cellpadding="0" cellspacing="0" class="layout">

    <tr>

      <td colspan=2><h1 class="title">Paquete Demo</h1></td>

    </tr>

    <tr>

      <td class="layout-left" style="vertical-align: top;" rowspan="2"
width="20%">

        <div class="page-toc" />

      </td>

      <td style="vertical-align: top;">

        <div class="body" id="body"></div>

      </td>
```

p.2 Install/setup Paquete

```
</tr>

</table>

</body>
```

Note

The structure can be changed and is reconfigurable.

4. Edit host page. In header section add the links to javascript files and initializing script.

```
<!-- Paquete setup -->

<script type="text/javascript" src="../shared/jquery-
1.4.1.min.js"></script>

<script type="text/javascript" src="../shared/json2.js"></script>

<script type="text/javascript" src="../paquete.js"></script>

<script type="text/javascript">

    jQuery(function() {

        var jQ = jQuery;

        var paquete = paqueteFactory(jQ);

        paquete.contentSelector = "div.body";

        paquete.titleSelector = "div.title";

        paquete.tocSelector = "div.page-toc";

        paquete.contentBaseUrl = "./";

        paquete.getManifestJson("manifest.json");

    });

</script>
```

Note:

contentSelector, titleSelector and tocSelector define where to put contents, titles and TOCs respectively.
